Project

TABLIO - Restaurant Table Booking App | UI/UX Design ([Link](#))

Problem: Users faced difficulties reserving restaurant tables quickly and conveniently, often dealing with long waiting times, unavailable reservations, and lack of a smooth booking experience.

Solution: Designed a modern restaurant table booking application featuring restaurant discovery, real-time table availability, seamless reservation flow, booking management, and user-friendly navigation. The final design focused on delivering a smooth, intuitive, and visually engaging experience that simplifies table reservations for users.
